

aquatherm lilac 50 x 4,6 mm Art. NR

aquatherm lilac:

The pipe-system for recycled / reclaimed water

Recycled and reclaimed water systems is becoming more and more important in building services engineering. This service water is hygienically safe and finds its use in the operation of water consuming equipment in differing facilities.

The recycled waste water can be applied for:

- ▶ flushing,
- ▶ irrigation,
- ▶ cleaning, laundry, etc

The new lilac pipe system has been developed exclusively for these fields of application. Thanks to the durable and corrosion resistant material polypropylene, lilac is particularly suitable for recycled and reclaimed water applications

Easy and quick installation technology

Installation is done using the fittings from the fusiotherm pipe system.

Safe and permanent connections are made by means of the internationally proven aquatherm fusion technology.

After the fusion the pipe and fitting form a homogeneous unit that will never corrode or leak.

Available dimensions

aquatherm lilac - pipe SDR 7,4 / SDR 11

Art.-No.	Dimension
9010808	1/2" - 20 X 2.8 mm SDR7.4
9010810	3/4" - 25 X 3.5 mm SDR7.4
9010212	1" - 32 X 4.4 mm SDR11
9010214	1.25" - 40 X 3.7 mm SDR11
9010216	1.5" - 50 X 4.6 mm SDR11
9010218	2" - 63 X 5.8 mm SDR11
9010220	2.5" - 75 X 6.8 mm SDR11
9010222	3" - 90 X 8.2 mm SDR11
9010224	3.5" - 110 X 10 mm SDR11
9010226	4" - 125 X 11.4 mm SDR11
9010230	6" - 160 X 14.6 mm SDR11
9010234	8" - 200 X 18.2 mm SDR11
9010238	10" - 250 X 22.7 mm SDR11

The advantages of **aquatherm lilac**

- ▶ corrosion resistant
- ▶ well-priced
- ▶ easy assembly
- ▶ durable
- ▶ high flow rate
- ▶ colour-coding accepted
